## 2025 Billing Guidance

### About Liberty-SI

The Liberty-SI Fusion System is intended for SI joint fusion for conditions including SI joint disruptions and degenerative sacroiliitis. The procedure involves the lateral insertion of 1 or 2 small titanium implants transfixing the SI joint designed to stabilize and fuse the SI joint. The following code may apply to minimally invasive SI joint procedures utilizing the Liberty-SI system. Physicians must use independent judgment and report codes that most accurately describe the services, items and/or supplies provided, as well as the patient's condition.

### Physician

CPT Code <sup>1</sup>	CPT Code Description	RVU (CF 32.34)	2025 Medicare National Average Payment

**Disclaimer:** The information provided contains general reimbursement information, is only presented for illustrative purposes, and does not constitute reimbursement or legal advice. Reasonable effort has been made to ensure the accuracy of the information provided, however, it is the sole responsibility of the provider to determine medical necessity, and to submit accurate and appropriate codes, charges and modifiers based on the services rendered and the patient's condition. Providers are also solely responsible for submitting claims for services consistent with coverage and billing requirements. Payer billing, coding and coverage requirements vary, and should be verified before treatment for limitations on diagnosis, coding, or service requirements because the existence of a specific code does not guarantee coverage or payment. Finally, all coding and billing submissions to the federal government must be truthful and not misleading, and requires full disclosure for the reimbursement of any service or procedure. Spinal Simplicity specifically disclaims any responsibility for actions or consequences resulting from the use of this information.
